Prac 6 Routing

PRACTICAL NO 6

DESIGNING THE MOBILE APP TO IMPLEMENT THE ROUTING.

Code :

```
import 'package:flutter/material.dart';
void main()
{
runApp(MaterialApp(
title: "NAVIGATION APK",
home: Page1(),
initialRoute: "/",
routes: {'/SECOND': (context) => Page2()}));
}
class Page1 extends StatelessWidget {
const Page1({super.key});
@override
Widget build(BuildContext context) {
return Scaffold(
appBar: AppBar(
title: Text("PAGE1"),
),
body: Row(
children: [
Text("WELCOME TO PAGE 1"),
ElevatedButton(
onPressed: () {
Navigator.pushNamed(context, '/SECOND');
},
child: Text("NEXT PAGE"))
],
),
);
}
}
class Page2 extends StatelessWidget {
const Page2({super.key});
@override
```

```
Widget build(BuildContext context) {
return Scaffold(
appBar: AppBar(
title: Text("PAGE2"),
),
body: Text("WELCOME TO PAGE 2"));
}
}
```
